WELCOME

Welcome to our 7th annual conference, this year titled ‘Keeping children and young people safe from gambling harms’.

The overall theme of the day will be focused on reducing gambling harms for children and young people, with speakers covering the issue from a range of different perspectives, including expert speakers from policy, research, prevention, and treatment backgrounds. Importantly, the day will focus on understanding this complex subject from the perspective of young people themselves.

The annual GambleAware conferences have been important in shaping the direction of research and policy development, as well as informing industry practice in relation to promoting player protection and safer gambling behaviour.

Thank you for finding the time to attend and thank you to Liz Barclay for chairing, and to all our speakers who have made the conference possible.
